

Hello,

Please do not weaken Wisconsin's do not call list. Our state's Do Not Call list has been a remarkable and positive improvement in our home life. We no longer receive irritating calls from businesses that we do not wish to call us. Companies do not have a right to interrupt the privacy in my home, especially if we no longer do business with them. Secondly, we in the state of Wisconsin should have the right to create laws that govern how our people are treated, in our homes, in Wisconsin. It is not appropriate for companies to call us, nor is it appropriate for the FCC to intervene and take away our rights in Wisconsin.
